PROFILE

Strong orientation towards backend development with a focus on efficient problem-solving. Recognized for analytical thinking, quick adaptability to new environments, and ability to collaborate effectively within development teams. Skilled in clear and effective communication to convey technical ideas understandably.

Eager to continue strengthening expertise in technologies such as Java and Spring Boot while gaining hands-on experience in real-world projects. Commitment, proactivity, and dedication drive me to consistently add value and exceed goals.

PROFESSIONAL EXPERIENCE

Globant – Backend Java + IA developer
18/08/2025 – 30/09/2025

- Selected among the top 5 students from the Backend with Java program at Globant.
- Temporarily hired to develop a system using Java backend and AI solutions provided by the company.
- Completed multiple training sessions on Artificial Intelligence and its integration into enterprise applications.

NoCountry – Work simulation | Backend and database developer

07/2024 – 08/2024
- Designed and developed the backend of a web application in a collaborative environment using Node.js, Express, and relational databases.
- Implemented REST APIs for seamless communication between frontend and database.
- Gained experience in teamwork and solving technical issues under tight deadlines.

Compañía Argentina de Entretenimientos SRL | Branch supervisor
2013 – 2021

- Led a team across 16 branches in Argentina, managing recruitment, training, and staff development.

- Coordinated logistics, supervised maintenance of gaming machines, and optimized operational processes.
- Developed and implemented internal improvements, increasing efficiency across multiple areas.
